

# DELIVERING OIL & NATURAL GAS IS ESSENTIAL FOR MODERN LIFE

SO ARE PIPELINES AND THE PEOPLE WHO OPERATE THEM.

## CAREER OPPORTUNITIES ARE ALMOST EVERYWHERE IN THE COUNTRY.

Our industry moves fuels and vital raw materials from where they're produced to where they are turned into needed products and then on to consumers. This means our career opportunities are almost everywhere in the country.

## CONSUMER PRODUCTS YOU DEPEND ON EVERYDAY.

Consumer products you depend on everyday are made from raw materials derived from oil and natural gas transported by pipeline. The building blocks for cosmetics, medicines, fabrics, plastic containers are delivered by pipelines.

## GETTING WHERE WE NEED TO GO.

The gas you put in your car, the diesel in your truck, or the jet fuel in the plane you fly all traveled at some point in pipelines. Pipelines deliver oil from production areas to refineries and then more pipelines deliver finished fuels from refineries to your local region.

## KEEPING OUR HOMES SAFE AND WARM.

Homes stay warm throughout the winter because of natural gas and propane. Homes across America depend on pipelines to deliver heating fuel made from petroleum products to their regions.
